SUGGESTED FONTS

There are thousands of various fonts that are available, however, we have found the following fonts work well when casting in metal. If you can't find a suitable font below, you can use other type styles. However, when you submit the vector artwork to us for production, please ensure that you "outline the fonts". In other words, that would convert the font to a graphic element. **Please be aware that not all type styles will work well on small text sizes.**

- **Arial**
  ABCDEFGHIJKLMNOPQRSTUVWXYZ
  abcdefghijklmnopqrstuvwxyz
  1234567890 &$()!?.,;:
